

# The BIG Benefits of Trees

## BENEFITS

### 1. Health

Trees purify the air we breath by taking in carbon dioxide and releasing oxygen. A trees roots help to purify the groundwater we drink.

### 2. Value

Healthy mature trees add an average of 10% to a property's value and give neighborhoods an established look.

### 3. Energy Savings

Properly planted and cared for shade trees can reduce home energy costs by up to 40%.

### 4. Climate Control

Trees cool the air by releasing water vapor and the earth by throwing shade.

### Money Tree

**Trees double in value every year!**

**Mature Trees can often have an appraised value of \$1,000 to \$10,000.**

#### Statistically Speaking:

According to the Center for Urban Forest Research, an average tree absorbs 10 pounds of pollutants (smog & greenhouse gases) from the air each year.
